

FARHAN MOHAMMED FATHAH

SOC Analyst | Cybersecurity & Identity Operations Specialist

Dubai, UAE • +971 55 557 2142 • farhanfathah@gmail.com

PROFESSIONAL SUMMARY

Cybersecurity-oriented IT Operations analyst with 12 years defending high-availability enterprise environments supporting 3,500+ users, including a regulated European data-centre engagement for Daimler Mercedes-Benz. Hands-on in identity and access security (Entra ID/Active Directory, MFA, Conditional Access, RBAC), incident response (phishing, malware, compromised-account remediation, sign-in/VPN anomaly investigation), and 24/7 SOC/NOC monitoring across BMC TrueSight, SCOM, Nagios, and Site24x7. (ISC)² CC and CEH v13 certified, with Microsoft SC-300 (Identity & Access) and CCNA. Currently building AI/ML (Python) skills to bring automation and AIOps into security operations — a natural fit for data-driven, compliance-conscious government and regulated-sector environments.

CORE SKILLS

- **Security Operations & Incident Response:** Phishing/malware response, compromised-account remediation, MFA enforcement, sign-in & risk analysis, SOC/NOC support, VPN security (Cisco AnyConnect), endpoint protection, firewall access control
- **Identity & Access Management:** Active Directory, Microsoft Entra ID (Azure AD), hybrid identity, RBAC, Conditional Access, Identity Protection, Microsoft SC-300
- **Monitoring & Threat Detection:** BMC TrueSight, Entuity, NetFlow Analyzer, Site24x7, SCOM, Nagios, ManageEngine OpManager
- **Compliance & ITSM/ITIL:** Incident, problem & change management, SLA/KPI ownership, root cause analysis, ServiceNow, BMC Remedy, ManageEngine ServiceDesk Plus
- **Infrastructure & Networking:** Windows Server, VMware, SCCM, Intune, Linux, TCP/IP, DNS, DHCP, OPNsense firewall, Microsoft 365 (Exchange Online, Teams)
- **Automation & AI:** Python (in progress), AI/ML fundamentals, AIOps and automation-driven troubleshooting

EXPERIENCE

IT Support Specialist & NOC Analyst | ENOC — Dubai

Feb 2022 – Present

Security Operations & Incident Response

- Analyzed and responded to abnormal user activity, suspicious browser behavior, and identity-related security incidents.
- Investigated suspicious VPN login attempts — including foreign logins, mismatched geolocation patterns, and MFA failures.
- Performed compromised-account remediation: secure password resets, MFA enforcement, and escalation to the Cybersecurity team.
- Conducted malware validation, AV scans, and threat cleanup for endpoints exposed to phishing or malicious links.
- Documented incidents in BMC Remedy with accurate categorization, root cause notes, and escalation workflow compliance.
- Collaborated with Cybersecurity and IAM teams on identity security events and potential breach indicators.

Monitoring & Alert Triage

- Proactively monitored enterprise infrastructure using BMC TrueSight and Entuity to detect anomalies, unusual traffic, device issues, and security-impacting performance deviations.
- Performed first-level triage of alerts and escalated potential security incidents, including latency spikes, abnormal device behavior, and traffic anomalies.
- Monitored critical retail systems (POS, Pumpomat, NCR) across 800+ locations, ensuring stable and secure operation.

Identity & Access Security

- Managed access controls for 3,500+ users across Active Directory and Microsoft 365, including privileged accounts, groups, license management, and hybrid identity sync.
- Validated suspicious MFA challenges, login failures, and sign-in anomalies before escalating to L2/L3 security teams.

Achievements

- Received a Certificate of Recognition (Q2 2023) for exceptional monitoring responsiveness and incident handling.
- Strengthened identity security posture by reducing compromised-account incidents through consistent triage and MFA enforcement.

IT Operations & Support Engineer | Expo 2020 — Dubai

Jun 2021 – Feb 2022

- Safeguarded mission-critical IT operations spanning 190+ countries during a global mega-event, maintaining secure connectivity under high-visibility, high-risk conditions.
- Reduced endpoint attack surface by enforcing patch and software-deployment compliance across the estate via ManageEngine Desktop Central.
- Resolved security-relevant incidents across Active Directory, Exchange/Outlook, and Cisco AnyConnect VPN, collaborating with NOC and Cybersecurity teams on firewall access control and infrastructure hardening.
- Standardized endpoint builds using Acronis imaging, cutting deployment time and reducing configuration-drift risk.
- Maintained reliable 24/7 operations for AV, CCTV, and VMS/SMS physical-security systems.

IT Coordinator | KPFF Global — Dubai

Aug 2015 – Jul 2020

- Owned end-to-end identity and access administration for 40+ users on Windows Server 2012 R2 Active Directory and Exchange Online, ensuring secure, high-availability access.
- Managed IT asset lifecycle controls — patching, antivirus, license compliance, backups — reducing exposure to unpatched and unlicensed software.
- Administered network security infrastructure: firewalls, routers/switches, and biometric access control for facility security.

System Engineer | Infosys Ltd — Bangalore

Jun 2013 – Dec 2014

- Delivered L1/L2 infrastructure support for the Daimler Mercedes-Benz European Data Centre — a regulated, high-availability environment — maintaining uptime and compliance standards.
- Monitored enterprise infrastructure with SCOM and Nagios, proactively flagging service risks before customer impact.
- Administered Active Directory, HP/Dell servers, VMware, and LAN/WAN infrastructure under ITIL-aligned incident, problem, and change management.
- Installed, configured, and upgraded OS and infrastructure components under strict change-control processes in a regulated corporate environment.

CERTIFICATIONS

- (ISC)² Certified in Cybersecurity (CC)
- Certified Ethical Hacker v13 with AI
- Microsoft SC-300: Identity and Access Management Associate
- CCNA
- Cybersecurity Internship — National Institute of Electronics & Information Technology (NIELIT)
- IBM Cloud Core Essentials
- Artificial Intelligence & Machine Learning using Python (in progress)

EDUCATION

Bachelor of Engineering, Electronics & Telecommunications — Visvesvaraya Technological University (VTU), Mar 2012
